## PARTS LIST

## SERVICE MANUAL ADDENDUM

**MANUAL NO. 5050-0373**

**REV. D**

BLANK

## **INTRODUCTION**

This addendum contains information necessary to identify replacement parts required to maintain the PRC 2000-2M System.

### **MAJOR UNITS AND ASSEMBLIES**

Table 1. Lists the major units and assemblies comprising the PRC 2000-2M System and the corresponding page numbers.

### **PARTS LIST**

The Parts List is arranged in major assembly sequence. Subassemblies and components within each assembly are listed in index number order. Index numbers for items having reference will not be shown on the figure illustrating assembly.

#### **INDEX NUMBER**

Items are identified by index numbers. These numbers are used in the corresponding illustration to identify the part.

#### **REFERENCE NUMBER**

This column lists the complete reference number for the listed item. Reference numbers for assemblies and parts of the PRC 2000-2M System reflect those items identified in schematic diagrams located in the Service Manual and PC Board Troubleshooting Service Manual.

#### **PART NUMBER**

The part numbers listed in the Part Number column are assigned by the manufacturer.

#### **DESCRIPTION**

The description column provides descriptive data of the parts.

#### **FEDERAL SUPPLY CATALOG OF MANUFACTURERS (FSCM)**

This column identifies the commercial (manufacturer) or government entity responsible for the item.

#### **QUANTITY**

This column identifies the quantity of items used in or to attach the next higher assembly.

### **SCHEMATICS AND WIRE DIAGRAMS**

Table 2. Lists the Schematics and Wire Diagrams of the PRC 2000 power source and the HS 150 HotSpot System.
